Ethics and biosecurity (3BL2197)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en biologie	Cours: 7 dj	contrôle continu: 1	3

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Automne

Equipe enseignante:

Brigitte Mauch-Mani
Jean-Marc Neuhaus

Objectifs:

Enable the student to correctly understand and apply Swiss legislation concerning biological security.
Introduce the students to the major concepts of ethics regarding our use of living organisms

Contenu:

Based on actual cases, the students will be introduced to the different aspects treated by biological security, including the protection of the population from infectious diseases, the health of workers and employees, and the health of animals, plants, and communities thereof as well as their living environment and soil fertility. Students will discuss their ethical positions regarding animal experimentation, use of transgenic organisms in the laboratory and in the environment.

Forme de l'évaluation:

Continuous control, with grades (contrôle continu noté)

Documentation:

Legislative texts, URLs, publications will be made available
