Survey sampling (5ST2015)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en méthodologie d'enquête et d'opinion publique (avant 2015)	Cours: 4 ph	écrit: 2 h	6
Master en sciences économiques, orientation politique économique	Cours: 4 ph	écrit: 2 h	6
Master en statistique (avant 2015)	Cours: 4 ph	écrit: 2 h	6

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Printemps

Equipe enseignante:

Prof. Yves Tillé
Institut de Statistique
Rue A.-L. Breguet 2, CH-2000 NEUCHÂTEL
phone office :+41 32 718 14 75 - email : yves.tille@unine.ch

Objectifs:

At the end of the course, the student must be able to design a sampling survey and to provide appropriate estimations and confidence intervals by using auxiliary information.

Contenu:

The first part of the course is dedicated to the planning of surveys. After a presentation of the general definition, the particular designs are introduced : simple random sampling, stratification, cluster sampling, multistage sampling, balanced sampling. The second part is dedicated to the problem of estimation with auxiliary information. The difference estimator, ratio estimator, regression estimator, are presented as particular case the general theory of calibration. The third part is dedicated to particular topics of survey sampling like treatment of nonresponse, small domain estimation.

Forme de l'évaluation:

E : 2-hour written test during the end of semester session of exams.

Reexamination session (August-September) : 2h written test

Documentation:

- P. Ardilly et Y. Tillé (2005). Sampling Methods : Exercises and Solutions, 382 pages, Springer-Verlag, New York.

Pré-requis:

none

Forme de l'enseignement:

- 6 ECTS credits
- Compulsory course for the master in statistics
- Spring Semester
- Course : 4 hours
- Exercises are put into practice based on the theory taught during the course. A large part of the exercises are dedicated to simulations of sampling selection and estimation by means of the `sampling` package of the R language.
