Luciano.lopez@unine.ch

Objectifs:

The main goal of this course is to provide a critical view of long run macroeconomic issues. More precisely, the course focuses on economic growth. It will provide the theoretical background behind the main economic growth models.

Contenu:

Long run macroeconomic topics are the main subject of this course. In particular, we will focus on the different classes of economic growth models: from the neoclassical Solow model to the endogenous growth models passing through the Ramsey, the AK and the R&D models. We will analyze the weaknesses and strengths of the models, and we will assess whether their implications are supported by the empirical evidence.

Forme de l'évaluation:

2h written exam during the exam session at the end of the semester (100%).
Retake (August/September): 2h written exam (100%). The exam is closed book.

Documentation:

Economic Growth, Barro and Sala i Martin. MIT Press, (2004).

Forme de l'enseignement:

2 hour lecture; 2 hour exercise session (each two weeks)
Lecture: Wednesday from 10.00 to 12.00 and Friday from 14.00 to 16.00, room C56
