Seminar: Social cognition and development (2LN2221)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en sciences cognitives	Séminaire: 2 ph	cont. continu	5
Pilier principal M A - sciences du langage et de la communication	Séminaire: 2 ph	cont. continu	5
Pilier secondaire M A - sciences du langage et de la communication	Séminaire: 2 ph	cont. continu	5

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Printemps

Equipe enseignante:

Prof. Fabrice Clément and collaborators

Objectifs:

This seminar will be linked to a research conducted within the Cognitive Science Centre on the phenomenon of interest. More precisely, we try to elucidate the following question: in daily conversations, what do people talk about and, more generally, what interests them.

Contenu:

In a first step, students will have to survey the literature and present an article that they found particularly relevant to the topic. In a second step, students will do some fieldwork in different contexts in order to collect data on conversation. These data will then be analyzed and presented in class.

Forme de l'évaluation:

The evaluation consists of an essay (about 10 pages) that will present and analyze the data while proposing some hypothesis about interest in conversations.

Forme de l'enseignement:

Lectures, conferences and workshops.
