CH-2000 Neuchâtel
Tel. +41 32 718 1347, Email: josephine.leuba@unine.ch

Objectifs:

The main goal of this course is to provide a critical view of short run macroeconomic issues. In particular the course will provide the students with analytical tools to assess the effects of shocks characterizing a closed and open economy using a theoretical knowledge for understanding how to deal with monetary policy issues and when to implement stabilization policies.

Contenu:

We will focus on short-run problems in a closed and open economy setup. Specifically, we will analyze monetary policy and aggregate demand (AD), inflation and aggregate supply (AS), the mechanisms behind the AS and the AD schedules and stabilization policies needed in case of demand and supply shocks.

Forme de l'évaluation:

Final: 100% (2-hour written exam during the last lecture of the semester).
Retake exam: 2-hour written exam (100%).

Documentation:

Readings 18, 19 and 20 of the CFA Level I textbook (2015).
Specific chapters of *Introducing Advanced Macroeconomics: Growth and Business Cycles*, by Peter B. Sorensen and Hans J. Whitta-Jacobsen. McGraw-Hill, (2005).
Additional material posted on the Claroline website (<https://claroline.unine.ch/index.php>).

Forme de l'enseignement:

Lectures: 1 hour per week - Exercices: 1-hour per week.
This is a general information subject to modifications.
