Recent advances in chemical ecology (3BL2213)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en biologie	Cours: 7 dj	contrôle continu: 1	2

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Printemps

Equipe enseignante:

Prof. Ted Turlings

Objectifs:

During this course students and teachers will discuss the latests hot topics in chemical ecology.

Contenu:

You will be assigned one scientific papers that you will have to summarise in a 1 page review and to discuss with the rest during one of the classes.

Forme de l'évaluation:

Contrôle continue. You presentation and one page summary will be evaluated. The emphasis will be on your critical assessment of the quality of the study that you presented.

Documentation:

Will be provided in form of PDFs

Pré-requis:

A solid background in biology and basic chemistry.

Forme de l'enseignement:

Discussion groups
