ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Printemps

Equipe enseignante:

Daniel Kaufmann, Institute of Economic Research, Rue A.-L. Breguet 2, CH-2000 Neuchâtel, office1.203, tel +41 32 718 1351 - daniel.kaufmann@unine.ch

Objectifs:

Students will understand causes and consequences of exchange rate fluctuations and the most important aspects of international financial transactions. Moreover, they will understand the peculiarities of macroeconomic policies under various exchange rate regimes. Finally, they will be able to apply their knowledge to judge under what circumstances various exchange rate and monetary regimes are desirable.

Contenu:

This course discusses the structure and interpretation of the balance of payments accounts. In addition, it introduces theoretical models to fix key issues concerning policy makers in open economies. Finally, the international monetary system and advantages and disadvantages of monetary integration will be discussed both, from a current and historical perspective.

Forme de l'évaluation:

100% of the final grade is based on a 2-hour written exam during the exam session.

Retake: 2-hour written exam during the exam session (100% of the final grade).

Non-programmable calculator is allowed. Neither documents, nor connected objects are allowed during the exams. In case of violation of these rules, the students are in situation of fraud and the unauthorized items will be removed. The exam could be deemed as failed.

Documentation:

The course is based on:

- International Economics - Global Edition - 10th edition by Krugman, Obstfeld, Melitz
- Additional articles
- References will be made available on Moodle

Forme de l'enseignement:

Weekly 2-hour in-class lecture. Occasional exercise sessions serve to strengthen the theoretical background.
