Neurosciences / Brain and cognition (2LN2201)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en sciences cognitives	Cours: 2 ph	Voir ci-dessous	5

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Automne

Equipe enseignante

Dr Delphine Preissmann

Objectifs

At the end of the course, students will have a deep knowledge of fundamental chapters in neurosciences (brain anatomy, cortical organization, perception..) and on affective and cognitive neurosciences. (i.e on emotions, empathy, decisions, addiction...). By presenting recent researches in behavioral neuroscience, this course aims to provide a better understanding of cognition/social behaviors by their articulation with previous psychological theories about behavior and mental activity.

Contenu

planning of the course (brief summary)

Introduction

Brain anatomy, Case studies

Action potential, neuromodulation

Somatic Sensory system, Perception

Language (aphasia)

Brain plasticity, Memory

Neuroimageries/states of consciousness, sleep

Affective and cognitive Neurosciences

Emotions, hormones

Addictions

Decisions, embodiment

Prosocial behavior / social pain

Empathy

Forme de l'évaluation

Written Exam (2h)

Documentation
