Contenu

The aim of this colloquium is to help students get started on their mémoire projects, notably by providing a support group to share ideas, and to answer questions of content (how to come up with a research question / idea, how to develop a bibliography, what critical approach to follow, etc.) and of form (how to organize the memoire, how long should it be, how to integrate quotes elegantly, how to vary your style, etc.). Emphasis will be placed on new resources such as digital archives and on-line criticism, but also on more traditional bibliographical resources such as scholarly editions and concordances.

The aims of this course are the following:

- To review research methods and resources, notably online
- To improve research-paper writing skills and writing style
- To generate ideas in view of preparing a mémoire project
- To develop a bibliography

Forme de l'évaluation
