Internship (3CB2013)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en conservation de la biodiversité	Stage: 240 pg	Voir ci-dessous	6

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Printemps, Semestre Automne

Equipe enseignante

ZEMP Clara; FORNEY Jérémie; KLOETZER Laure; PRAZ Christophe; AEBI Alexandre; MITCHELL Edward; LUCEK Kay; RASMANN Sergio

Contenu

An internship is one option to validate part or all of the ECTS related to this block. It implies a collaboration with an external or internal organization, in Switzerland or abroad. There are diverse ways to identify possible internships, either in dialog with the professors of the master or on the basis of your own exploration.

An internship must be validated by your master thesis supervisor beforehand. A collaborator of the hosting organization must be identified as the external or internal internship supervisor. The agreement must also describe the tasks and duties of the intern.

The internship can be directly related to your master thesis, however, it must imply additional work realized in collaboration with the partner organization, which adds to the expected work related to the 30 ECTS of the master thesis.

The internship is validated on the basis of a short internship report written by the student and an evaluation report delivered by the external internship supervisor. The format of the reports, as well as the timeline for submission, needs to be discussed with the master thesis supervisor in advance.

The duration and timeframe of the internship have to be discussed with the master thesis supervisor and the external internship supervisor. The number of ECTS will depend on the objectives of the internship and corresponding estimated amount of work. As a general guideline, 1 ECTS corresponds to 25-30 hours of work for the student.

Forme de l'évaluation

The internship is validated on the basis of an internship report written by the student and an evaluation report delivered by the external internship supervisor. The format of the reports, as well as the timeline for submission, needs to be discussed with the master thesis supervisor in advance.

Evaluation is in the form of continuous assessment on a pass/fail basis.

Modalités de rattrapage

Reassessment following a fail grade will be decided by the course controller.
