Contenu

This course splits into two parts. The first part presents the basic concepts, the theories and policy instruments related to international trade and finance. The second part presents the basic principles, the historic developments and the main features of the international monetary system with the aim of gaining an understanding of the recent international development and current policy issues.

Part I:

- Theories of the demand and supply of money
- International Trade
- National Income Accounting and Balance of Payment
- Exchange Rates, calculation and theory

Part II:

- Monetary and Fiscal Policy
- Basic principles of the International Monetary System
- Historical overview from Gold Standard to Bretton Woods system and the IMF
- The collapse of the Bretton Woods system and the European integration
- Developing and emerging economies, the crises, and lessons learned
- International Capital Flows
- Global Imbalances

Forme de l'évaluation

- 2-hour written exam during the exam session at the end of the semester
- In case of an in-person exam, this will be a closed-book exam, so no documentation or connected devices are allowed during the exam.
- In case of an online exam, the exam will be an open-book exam with the possibility to consult the relevant documentation.
- In case of violation of the above rule, the students are in situation of fraud; the unauthorized items will be removed and the exam could be deemed as failed.
- Re-examination session : 2-hour written exam (100%).
