Natural substance analyses (3BL2196)

Filières concernées	Nombre d'heures	Validation	Crédits ECTS
Master en biologie	Cours: 7 dj	Voir ci-dessous	3

ph=période hebdomadaire, pg=période globale, j=jour, dj=demi-jour, h=heure, min=minute

Période d'enseignement:

- Semestre Automne

Equipe enseignante

Prof. Stephan von Reuss, Prof. Gregory Roeder, and their assistants

Contenu

Introduction to natural products chemistry - Standard isolation techniques for natural products - Selected analytical methods including: chromatography (GC, TLC, HPLC), UV-Vis spectrophotometry, Infrared spectroscopy (IR), Mass spectrometry (MS), and Nuclear Magnetic Resonance spectroscopy (NMR).

Forme de l'évaluation

Continuous assessment graded.

At the end of both sections a short written evaluation will be organized. The final grade will be the average from both these tests.

Modalités de rattrapage

In case of insufficient grade, a reexamination must be registered in IS-Academia after formal notification of the initial grade and coordinated with the professor in charge (not in Pidex).

Documentation

<https://moodle.unine.ch/>
Registration compulsory

Pré-requis

University introductory courses on general chemistry, organic chemistry, and analytical chemistry.

Forme de l'enseignement

Lectures and selected reading
Laboratory sessions

Objectifs d'apprentissage

Au terme de la formation l'étudiant-e doit être capable de :

- Practice some analytical chemistry with real natural products and methods, including data processing
- Distinguish main methods and techniques used in natural products chemistry (extraction, isolation, identification, quantification, etc.)

Compétences transférables

- Integrate analytical chemistry of natural products (with strengths and limits) to a scientific research plan
