Contenu

This course gives an overview and introduces students to sustainable development and the methods of economic analysis for environmental issues. Concepts, models and their applications to pollution control and global environmental problems such as climate change are discussed in class.

Forme de l'évaluation

- 2h written exam during the exam session at the end of the semester (100%)
- No documents or connected objects allowed. Any violation of these rules will be considered as fraud, leading to the withdrawal of unauthorized items and possibly exam failure

Modalités de rattrapage

- 2h written exam during the exam session (100%)
- No documents or connected objects allowed. Any violation of these rules will be considered as fraud, leading to the withdrawal of unauthorized items and possibly exam failure.

Documentation

- Perman, Roger, Michael Common, James McGilvray and Yue Ma, Natural Resource and Environmental Economics, Addison-Wesley, 4th edition, 2012.
- Additional readings provided during lectures and made available on Moodle

Pré-requis

students have to be familiar with basic microeconomics and statistical concepts and techniques (e.g. course Microeconomic Policy, Applied Microeconometrics).

Forme de l'enseignement

2-hour lecture

Objectifs d'apprentissage

Au terme de la formation l'étudiant-e doit être capable de :

- Evaluate existing theories and empirical evidence
- Recognise the main possibilities and problems related to economic policy in environmental economics
- Synthesise and discuss research papers in class
- Employ an interdisciplinary approach to environmental problems

- Faculté des sciences économiques
- www.unine.ch/seco

Environmental economics (5ER2023)

- Apply abstract analytical frameworks to real-world issues
- Identify and take into account key particularities of environmental economics
- Recommend instruments for policy making
- Differentiate relevant from non-relevant information
- Judge the value added, limitations and caveats of approaches
- Assimilate relevant information from papers

Compétences transférables

- Apply knowledge to new situations
